LOCAL NEWS

Mr Alonzo D Hall, well-
known ball player and sports-
man, has severed his connec-
tion with the Royal Hotel,
where he had been employed
for some time. "Blondy," as
he was known to his intimate
friends, has a host of friends
in this and Spruce Grove dis-
tricts, who wish him success
in his new possession.

R. C. services will be held
in the Town Hall on Sunday
next at 11 a.m.

Sommerfield & Mayer have
sold a new Chevrolet sedan to
Const. Bowen, of Rochefort
Bridge.

Mr P Meredith spent the
week-end at Leduc, as the
guest of Mr Smith.

Mr R Speakman, Edmon-
ton, was a visitor in Stony
on Saturday.

If your eyes bother you, or
you suffer from headaches,
why not have your eyes at-
tended to by an expert? M M
Mecklenburg, eye specialist,
will be in Stony Plain on Fri-
day, June 1st.

Funeral of Mrs. Goerz

The funeral of the late Mrs
Henry Goerz took place on
Sunday afternoon. Services
were held at the house, after
which the funeral cortege pro-
ceeded to St Matthew church
(Missouri Synod), where ser-
vices were conducted by Rev
K Eberhardt, the pastor. The
edifice was crowded to the
doors.

Following the service at the
church, interment took place
in St Matthew cemetery. An-
other short service was held
at the graveside.

The large turnout of relat-
ives and friends made this one
of the largest funeral proces-
sions seen hereabouts in a
number of years.

Walther League Rally.

Sunday May 20 was a great
day for Walther Leaguers. On
that day the Leaguers had a
rally to which all the neigh-
boring congregations were in-
vited. There was close to 100
young people present.

At 10.30 a special sermon
was given to young people by
Rev C Thies of Edmonton.

At 2.30 all young people
met on the grounds at St
Matthew school No. 1. After
a series of outdoor games all
the young people went to the
church, to hear the following
speakers—

Rev C Thies, "Immigration
& Hospice."

Rev H J Boettcher, "En-
tertainment & Athletics."

W Rosnan, "Finances."

Mrs W A Raepler, "Sum-
mer Camp & Conference."

After the sessions all went
back to the school grounds,
where a fire had been built
for a weanier roast. After a
hearty meal of roasted wean-
er, all left for home.

PARLIAMENT BUILDINGS, EDMONTON, ALBERTA.

BUILT on a wheelbase of 107 inches—four
inches longer than before . . . swung low
to the road . . . and with its hood streaming
back in graceful, unbroken lines to blend with
contours of the Fisher bodies—the "Bigger and
Better" Chevrolet is everywhere hailed as a car
of outstanding distinction.

The new radiator is higher and narrower, and
embellished with a large, flat, all-metal radiator
cap. The hood is longer and deeper—vividly
interpreting the greater stamina, staunchness and
business of the new chassis. Windshield
posts are slender and graceful, bodies are beauti-
fully headed and paneled, hardware is of period
pattern, and roof-lines are smartly low.

Interiors, too, are impressively rich—with new
upholsteries, wide, restful seats, and a beautiful
enclosed instrument panel—indirectly lighted.
Come, see this great new car—and you'll know
why thousands have acclaimed it the world's most
luxurious low-priced automobile. C-18-9-12C

The C.M.A.C. . . . General Motors now delivers payment also

Let Us Celebrate

A year ago the people of Canada engaged with a very real enthusiasm in the celebration of Dominion Day, the Diamond Jubilee of Confederation. It was, of course, an especially memorable anniversary and for weeks and months many committees of public-spirited citizens spent long hours in planning and preparation for the notable ceremonies which marked the sixtieth anniversary of Canada's birth. The effect of that general observance of Dominion Day from sea to sea, and the carefully planned and well executed programmes, including educational and historical features of great value, was at once noticeable in the greater pride and renewed confidence in Canada, and its future which was displayed by the Canadian people.

The year which has since elapsed has been a year of expansion and prosperity throughout the Dominion. Steadily, even rapidly, the Dominion of Canada has grown in national stature and in international importance. It has commanded, and continues to command, an ever increasing interest in other countries, while outstanding men and women in realms of government, education, finance, commerce and industry, not only in Canada, but throughout the world, have referred to this Dominion as among the most favored of all lands, and the one country above all others which today offers the greatest opportunities and the brightest promise for the future.

The Diamond Jubilee celebrations of a year ago helped to arouse and to stimulate the national consciousness of the Canadian people, and, because no country can be truly great lacking a national spirit and consciousness, the celebrations last year have more than repaid all the time, thought and money on them.

It is not sufficient, however, to the cultivation and growth of a national spirit and national aspirations that the birthday of a nation be widely and fittingly observed once in every sixty or one hundred years. Individuals observe their anniversaries annually. Once a year every successful business establishment takes stock of its position, notes its gains or losses, and, in the light of the experience thus gained, plans future operations. Every year boys and girls reach that period in life when they grasp the inner meanings and depths of things to which formerly they gave little or no heed. A nation should, therefore, devote time and thought to a suitable recognition and observance of its national day in each and every year in order that its significance and all that it really represents may be impressed upon the minds and engrained in the hearts of its youth.

This article is a plea, therefore, to the people of Canada that they should profit by the experience of a year ago, and that Dominion Day this year and in each succeeding year, should be more generally observed than was the case prior to last year. True, it is not possible that such annual observance be on the scale of the Dominion Jubilee celebrations, but Dominion Day can be observed each year in something more than the rather perfunctory manner which prevailed in most places prior to 1927.

It is gratifying to note in the columns of the weekly papers of Western Canada that steps are being taken in an unusually large number of communities to again fittingly celebrate Dominion Day this year. But the number of such places could be largely increased, and it is earnestly to be hoped that in those communities where, as yet, no definite action has been taken to organize citizens' committees for a proper celebration of Dominion Day, 1928, no further time will be lost in taking such action. It is a duty we owe to the growing youth of Canada that they be taught to observe the natal day of their country, and that through observance of Dominion Day a true love for and pride in Canada be developed.

Aeroplane Service For West

Expect To Establish Flying Service Between Winnipeg and Pacific Coast

With the ultimate object of establishing an aeroplane service between Winnipeg and Pacific coast cities, the Western Canada Airways Limited has purchased the Pacific Airways Limited, Vancouver. Plans have already been made to extend the activities of the Pacific Company to take in part of Alberta and a larger territory on the seaboard.

The highest peak in the Canadian Rockies is Mount Robson, in British Columbia. This mountain has an elevation of 12,972 feet above sea-level.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 60 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer when you learn how quickly, how easily this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any druggist.

International Conference Held At Regina

Third International Wheat Pool Conference To Be Held Soon

The Third International Wheat Pool Conference will be held in Regina on June 5, 6 and 7 next. For the first time, representatives from co-operative organizations other than those engaged in the marketing of grain will be present. Various produce pools as well as consumer's co-operative organizations from several parts of the world will be represented at the Conference. Last year's conference was held in Kansas City, Missouri.

SAME SYMPTOMS IN MANY CASES

An Anaemic Condition Equally Recognized—Calls For a Blood Builder

In most cases of anaemia the symptoms are almost the same. The sufferer grows pale, is easily tired after the least exertion. The appetite is fickle and the patient loses in weight. Sometimes there are headaches, and often inability to sleep well. As the blood becomes thinner the symptoms become more pronounced and often there are fainting spells. All this shows that the blood is thin and watery, and at the very first symptoms of this condition the patient should take Dr. Williams' Pink Pills, the most reliable blood-builder and nerve tonic known. The sole mission of this medicine is to enrich the blood, and when that is done all the distressing symptoms disappear. Among those who have reason to praise this medicine is Mrs. M. E. Patterson, Shandin, N.B., who says:—"About four years ago I became very much run down, I could not eat, sleep nor rest, and I grew so nervous that the smallest things would annoy me. Eventually I grew so weak that I did not have strength to move about without help. I was just a miserable wreck, and became very much discouraged as I had tried many medicines which failed to help me. In this wretched state a friend urged me to try Dr. Williams' Pink Pills. I did so and before long found they were helping me. Gladly I continued taking the pills until I fully regained my health and strength and I have since continued in the best of health. Later my daughter became anaemic and six boxes of the pills restored her to health, strength and color. Naturally I consider Dr. Williams' Pink Pills a blessing to weak, run-down people."

You can get these pills through any druggist in the Dominion, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Appointed Danish Consul

H. P. Madsen Will Represent Danish Government in Northern Alberta

H. P. Madsen, of the Edmonton City Dairy, has been appointed Danish Consul for Northern Alberta, with headquarters at Edmonton. Increasing Danish settlement, estimated at 3,709 in 1927, is given by the Danish Government as the reason for the establishment of the consulate. The territory will likely extend from Red Deer north.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

British Army Men For Canada

Will Arrange To Place Demobilized British Soldiers On Land Here

Col. J. H. Stibbard, Commandant of the British Army Training Centre at Chisleholme (Wiltshire), England, is now in Canada planning to draft out large numbers of demobilized British Army men to Canadian farms if satisfactory arrangements can be made with the Government and other organizations. Up to the present most of these men have gone to Australia, the Colonies states, where they have done splendidly. The course of farm training is thorough and begins six months prior to actual discharge from the army.

People of 65, according to a British M.P., don't go to work for the love of it. Other people who likewise don't go to work for the love of it are those of 25, 35, 45 and 55.

Minard's Liniment for insect bites.

Takes Place Of Sight

Gauges In New Airplane Enables Pilot To Fly Blindly

An aeroplane which can find its own way about is the latest wonder. This has been invented by a French aircraft designer. A new set of gauges, which a pilot can learn to read in a few hours, takes the place of human sight.

Twelve French pilots were the first to give the new machine a trial. At the beginning each was inclined to spiral, and then to wobble a little, but when they had become used to their instruments, they were able to control their machines perfectly. They flew blindly to a point thirty miles away, turned, and came back to the take-off. The new invention should be invaluable for flying by night or in fog.

For a City Beautiful

To make Ottawa second in beauty to none of the capitals of the world, is planned in a measure which proposes the expenditure of \$200,000 annually for 30 years, with an immediate outlay of \$5,000,000. One of the principal features of the improvement scheme, is the formation of a large central park.

Among some Indian tribes of North America it is customary to cut the hair of widows and forbid them to renary until their hair has grown again to its original length.

Bringing In Settlers

During the first four months of the present year the Canada Colonization Association was responsible for the settlement of 224 families on 46,207 acres of land.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

The judgment of Solomon was great, but he never tried to umpire a baseball game.

For Rheumatism use Minard's Liniment.

Nearly 25,000 London school children began to wear spectacles in the past year.

Here's How

You Can Always Keep Your Farm Buildings in Good Repair

GYPROC Advantages for Farm Buildings

Easy to use. Long coat. Workable as lumber. Cannot warp, bulge, crack, shrink or burn. Takes any decoration. Resists heat and cold. Vermin proof. Eliminates repairs. Protects your stock. Best for iced areas, poultry houses, barns, grain bins and other farm buildings. Especially suitable for converting attics and basements into extra rooms.

THOUSANDS of farmers have learned how easy and economical it is to keep farms up-to-date with Gyproc. Whenever repairs or alterations are required—whenever new buildings are needed—they rely on this famous fireproof wallboard.

For fast, economical, fireproof construction there is nothing to equal Gyproc. It cannot warp, crack, shrink, bulge or burn. Its million-celled rock insulation protects stock from cold, heat and vermin. Saves time, saves labor, saves fuel—the easiest to erect and most satisfactory Wallboard you can buy.

Some Interesting Speculations As To What Future Holds For The Development Of Canada

Discussing the most recent estimate of Canada's national wealth, placing this at \$26,000,000,000, or \$2,700 per head of population, the Monthly Journal of the British Empire Chamber of Commerce observes that "to make comparison with the United States it would be necessary to multiply Canada's wealth by twelve" in order to equalize populations. This would give the Dominion an aggregate of \$300,000,000,000, a sum that does not differ greatly from the estimate of the national wealth of the United States made for 1925. The Journal sees reason to believe that the national wealth of Canada will expand at a rate its great neighbor "will find it hard to exceed from the percentage standpoint." While the respective rates of increase will naturally be a matter of strong interest a much more important consideration relating to the development of the Dominion can be found elsewhere.

This was touched upon recently by the New York Sun when it pointed out that Canada is in a position to profit, proportionately, more than the United States, from every advance made and to be made by science. Its industrialists and statesmen are so situated that they may guide their activities not only by the successes but by the failures of others; the distressing results of waste and wanton destruction, the possibilities of conservation and replacement of natural resources, are an open book to which chapters are added every day from experiment and experience. Machinery economically far more efficient than anything now known, devices today only speculatively projected as remote possibilities, transportation facilities that will make what are now tedious journeys a pleasure, the possibilities of utilizing the earth and the fullness thereof by man if he exercises ordinary common sense. Canadians, the New York paper pronounces, have given many exhibitions of possession of that endowment.

What is true of development in Canada is true of every other land hitherto unexplored. Today there is no measuring stick by which may be even faintly suggested the stupendous possibilities of what is the utilization of the earth and the fullness thereof by man if he exercises ordinary common sense. Canadians, the New York paper pronounces, have given many exhibitions of possession of that endowment.

What It Stood For
Sight-seeing Guide (on rubber-neck wagon): And ladies and gentlemen, on your right you see a monument erected last year to a notable cause.

Inquisitive Old Lady: And what does it stand for?
The Guide (sarcastically): Because, madam, it would look silly lying down.

Western Honey Production
Manitoba and the other Prairie Provinces are increasing their production of honey much more rapidly than the eastern provinces, and last year they produced the biggest crop in their history, according to C. B. Gooderham, Dominion Apiarist.

MADONNA AND CHILD
Sir Joseph Duveen has established a new record in the history of prices for paintings by giving \$375,000 for Raphael's masterpiece, "Madonna and Child," at an art sale in England. Sir Joseph purchased the famous picture from Lady Desborough.

W. N. U. 1735

Shipped Himself C.O.D.

German Immigrant Discovered In Packing Case On New York Pier
Equipped with his passport and a visa as a quota immigrant, and nailed into a packing case consigned C.O.D. to himself at a fictitious address in New York, John Phoenix, 19 years old, of Dusseldorf, Germany, who took this method of stowing away on a trans-Atlantic liner, was discovered only after he had been unloaded on to the pier in New York.

A checker, noticing a loose board on the case, thrust his hand in to investigate, and Phoenix, without thinking, shook it. The checker ran down the pier shouting that he had been bitten by an animal. The box was opened and Phoenix stepped out. Phoenix was somewhat emaciated when he was found, and his first demand was for food. He explained that after he had received his visa he found he had not enough money to travel to the United States, so, with the help of a friend, he constructed the box. It contained blankets, a cord hammock, a five-gallon jar of water and a supply of sausage, pumpernickel and chocolate. While the ship was at sea he loosened a board and was able to get out and walk around, but could not find any additional supplies.

For the Larger Woman

The woman with a mature figure will appreciate Design No. 908 with its swathed hipline, slightly bloused bodice and deep, open front finished with unusual revers collar. Inverted plaits and flared movement to hemline. Printed silk crepe in combination with plain harmonizing crepe is pictured and is a smart choice for street. Printed sheer crepe, a little more dressy, is also adaptable. Crepe satin, wool georgette and faille crepe are serviceable. Pattern in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. The 36-inch size requires 5 1/2 yards of 40-inch material with 1/4 yard of 20-inch contrasting. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

PRINCESS LICHNOWSKY

Princess Mechtilde Lichnowsky is not only a noted author but also an inveterate pipe smoker. She is the wife of the late Prince Lichnowsky, who was German ambassador to England from 1912 to 1914. She is now a resident of Czechoslovakia and has numerous novels and plays to her credit as well as some verse and drawings.

Jewish Farmers Successful

Hold Million Acres In U.S. Worth Over Hundred Million Dollars

There is a steadily increasing drift of Jews to the farm lands of the United States, according to a report just issued by the Jewish Agricultural Society. In the twenty-eight years of its existence this society has fostered the back-to-the-land movement, and it has succeeded in inducing a large number of people to abandon city life for that of the farm.

In 1900, when the society was incorporated, there was a Jewish farm population of 1,000 in the United States; at the end of 1927 some 80,000 Jews were tilling the land. It is estimated that they hold 1,000,000 acres and that their property is worth \$150,000,000.

"Our people are rarely thought of as tillers of the soil," said Gabriel Davidson, general manager of the society. "They are invariably associated with trade and industry, but there has never been a time since the Colonial days that there has not been a 'back-to-the-land' movement among them in the United States — an instinct which reaches back over 2,000 years."

OLD FORT IS NOW MUSEUM

1. Fort Ann, showing how the grounds have been made into a golf course.
2. The first powder magazine of Fort Ann, built in 1782.

It was in the year 1604 that the Annapolis Basin became known as "Port Royal" — the royal harbour — named by Samuel De Champlain, who was second in command to Timothee Pierre du Guast, Sieur de Monts, when he entered with a small battalion the sheet of water now known as the Annapolis Basin. The name finally attached itself to the surrounding settlement and was known as such until the British conquest in 1710, when the place was renamed in honor of Queen Anne, Annapolis Royal.

After a period of years the country was restored to France and D'Auany erected the first fort on the present

Canadian Mining Industry Appears To Be On The Eve Of Great Revival And Expansion

With the development of the present century has also come the necessity of again revising the older estimates of the Dominion and of the place it is destined to hold in the world economy. Until comparatively recent years, even in the judgment of well-informed individuals, Canada as a habitation of civilized people comprised only a fringe of productive soil lying between the northern wilderness of ice and snow and the northern border of the United States. Nor has that view entirely disappeared on this continent, for it is still voiced occasionally by public men and the press of the Republic. Yet we who are privileged to live in this favored land know how wide of the mark that judgment was and how little it is in accord with the actualities of the present and still less with the potentialities of the future.

Even that other and more reasonable opinion that divided Canada roughly into an industrial east, three prairie provinces and the Pacific coast is no longer as true as it was once. Manitoba, classed as mainly a grain-growing region, is becoming an important manufacturing centre and is daily increasing its prospect of ranking at no remote date among the centres of the mining areas of the Dominion. Nor is there any sound reason for limiting mineral deposits to those already known, rather are the geological and metallurgical experts justified in their assurance that prospectors as yet have only done a little superficial scratching and uncovered but examples of the wealth that is buried in the ancient formations that form the crust of so large a portion of Canada from the Atlantic to the prairies.

Recently the Department of Mines issued its preliminary report on the mineral production of the country for the value of the mineral output for 1927, at \$244,520,098, an increase of 4.09 million dollars, or 1.7 per cent. over the previous twelve months' record of \$240,437,123. The further statement is made that:

"New output records for all time were established in gold, copper, lead, and zinc among the metals, gypsum in the non-metal, and structural materials field. Values for natural gas and petroleum production, also exceeded any recorded in previous years. Increased outputs, in comparison with totals for 1926, were noted in the

figures for arsenic, cobalt, copper, gold, lead, nickel, platinum, metals, zinc, coal, natural gas, petroleum, gypsum, pyrites, clay products, cement, limestone, sand and gravel."

Further expressions of the official view are contained in the annual report of the Department for the fiscal year ending on March 31, 1927, prepared under the supervision of Dr. Charles Cammell, Deputy Minister. After noting the expanding view of the annual Canadian output and the additions constantly being made to the area under exploration, he pens this enthusiastic summary of the present position and future prospects of the mineral industry. In his own words:

"In addition to the extent of Canada's physical field for further development, which in itself furnishes a reasonable basis for confidence in the growth of Canadian mining, there are a number of other factors that have a vital bearing on the outlook. Great technical advances have been made in prospecting methods and in mining and metallurgical practice, and Canada is now better equipped in personnel for advancing in mining development. The intelligent interest aroused throughout the country in recent years is a force in itself, and as a result of the close relations existing between the universities, government departments, and the mining industry, the Dominion is gradually being better equipped with engineers, geologists, metallurgists, and other technical staffs. Through field and laboratory investigations and in other ways, both Federal and Provincial Governments are assisting in the work of mineral development. Moreover, the railway companies, banks, and other business interests have become deeply impressed with the importance of mining and are giving it a measure of attention already great, and likely to increase as development continues. It may, therefore, be said that there is behind the Canadian mining industry a strength of support which leaves little likelihood that the industry will fail to advance through any lack of competent business or technical backing."

Planting Seed From The Plane

Reforestation Scheme Is Idea Of Large Pulp Company

Whole forests may spring up if the plans of a large pulp company to plant trees from aeroplanes are carried out this summer, as was decided at a recent meeting of the Royal Canadian Institute. Grass seed was successfully sown from aeroplanes in the United States last summer, with the result that efforts will be made to sprinkle tree seeds from the air as part of a reforestation scheme in Northern Quebec. More than 200 square miles of forest a day could be planted if the project were feasible.

Dairy Factories In Canada

The latest returns show that the number of dairy factories in operation in Canada is 3,947. The total is made up of 1,269 creameries, 1,418 cheese factories, 334 factories making butter and cheese, and 26 factories making condensed and evaporated milk powders, etc.

Quotations in verse and color, illustrations decorate some of the German notes.

"Mother, you remember the teacher who was ill?"
"Yes. Are you crying because he is dead?"
"No. He has recovered!"
Melo, Paris.

In difficult feeding cases

—when no food seems to agree with Baby—use Eagle Brand. It nearly always solves the problem.

WORLD HAPPENINGS BRIEFLY TOLD

J. Ramsay MacDonald, Labor leader and former premier, will start on a holiday trip to Canada at the end of July. He will be accompanied by his three daughters.

Just to prove it can be done, two waiters are hiking from Berlin to Geneva, 1,000 miles, wearing boiled shirts, swallowtails and patent leathers.

Field Marshal Moritz Auenberg, Von Komarow, one of Austria's most able generals during the Great War, is dead of heart disease. He was 76 years old.

Reports of a kind which usually turn out to be well founded are circulating in Paris that the Nobel peace prize will be awarded to Secretary F. B. Kellogg, this year, for his work in forwarding world peace.

The government intends to put in to force the long term farm loans act as provided by chapter 46 of revised statutes of Canada. Hon. Ernest Lapointe, minister of justice, stated in the House of Commons.

Argument by Dominion and the provinces on the questions respecting power and property rights on waterways before the Supreme Court of Canada has been deferred until September by a decision made by Chief Justice Anglin.

During the first three months of this year, the value of the mineral output of Ontario had exceeded the corresponding months of last year by a million and a quarter dollars, according to Hon. Charles McCrear, Provincial Minister of Mines.

British movies produced under the act which compels British exhibitors to show a certain percentage of British films will probably be shown throughout Canada. Twelve British films have been purchased for £100,000 cash on account of bookings by the United Motion Picture Products of America.

Peevish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

To read all the United States laws would take eight years and four months of steady reading, eight hours a day, counting in Sundays and holidays.

HEART WAS SO WEAK Had to Stay in Bed

Mrs. F. Wilson, Lethbridge, Alta., writes: "My heart was very weak, and I had to stay in bed for five weeks with it."

"My aunt advised me to take

as she had taken them with good results after a very bad operation. "I took them and some time after a doctor came to examine me for life insurance and he said there was nothing wrong with my heart."

Milburn's Heart and Nerve Pills are 50c. a box at all druggists and dealers, but will be mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Farmers' Marketing Tour

Canadian National Railway Tour To Great Britain and Denmark, 1928

Continued.

Our first engagement on the following morning was to visit Liverpool Cathedral, one of the most beautiful examples of modern architecture in Great Britain and the largest ecclesiastical building in the country. It is 584 feet long and will take in all 75 years to complete. It has now been building twenty years. This wonderful cathedral is exceeded in size only by St. Peter's, Rome, Seville Cathedral, and St. John's Cathedral, New York. The style is Gothic and the building material red sandstone. The roof is of solid copper. It is the first cathedral to be consecrated in the northern counties for 600 years.

The memorial chapel to the men of the diocese killed in the War, is perhaps the most impressive part of the beautiful building. Here is to be seen in a receptacle lined with pure gold of gold, containing the names of 40,000 men of all creeds who gave their lives in the Great War. The volume itself has taken eight years to complete and has cost \$30,000. The chapel is ringed with the crests cut in stone of the various regiments. At one end is a "Window of Sacrifice" in which are depicted some of the greatest acts of valour in history. Above the Holy Table, which is beautifully wrought in solid oak are two life-size bronze figures of a soldier and a sailor.

The ceiling of the nave is the loftiest in the land, rising 116 feet above the floor and the stained glass window at one end of the nave is the largest in the country. The organ has 168 stops and 100 pipes and is electrically operated. It cost £50,000 and is the biggest in the world.

We had fallen to rest under the spell of the beautiful cathedral when we had to hurry to keep our appointment with the Liverpool Produce Exchange, operated by the Liverpool Provision Traders' Association. It is an organization for trading in products (bacons, hams, sides, lard, meats in pickle), in butter, eggs, etc., and is, therefore, directly interested in Canadian trade. Its dealings are spot and c.i.f. except in lard which may be either option or spot. Its lard option market is the largest in Europe. The actual trading is practically all done privately, but a large amount by telephone. Considerable interest was shown in our visit by the members who gave us a cordial welcome.

A tour of the Liverpool Fruit Exchange and Auction was illuminating. Each big brokerage firm has its own auctioneer. Dealers view the fruit before it is put up for auction, or during the actual selling may be furnished with samples as they require them. To facilitate this an elevator in the centre of the pit brings up samples from the basement of each lot offered for sale. These may be left in boxes or spread out in large shallow baskets in order that all dealers may get a fair idea of the whole lot.

The auctioneers work at high pressure. Much trading is done by signal, and should the auctioneer make a bid, as he occasionally does, the dealers express their disapproval by stamping. The auctioneer as a rule knows the name of every man in the pit. It is said that one man has sold as many as 16,000 boxes of fruit in 20 minutes and on one occasion a whole shipload was disposed of in a similar space of time.

Before leaving Liverpool, we had opportunity to discuss with representatives of the provision traders some of the problems in marketing Canadian produce in Great Britain, and gained valuable information as to the requirements of the British market in bacon, cheese, butter and eggs.

We were now due to leave for Manchester in the magnificent motor coaches of the Globe Travel Company calling en route at the Walton Hall Piggeries, the famous hog breeding centre owned by Lord Daresbury, whose herd of large Whites or Yorkshires has won awards at the most important shows in Great Britain. Several prize boars were brought out for our inspection and we were shown the molasses clean farrowing pens and some of the early season piglets. Individuals of this herd are shipped to breeders in South America, Italy, France, Hungary, Poland, Holland and Switzerland.

Manchester, Lancashire's greatest inland city, although 100 miles from the sea, is the fourth port in Great Britain. This has been made possible through the construction of the Manchester Ship Canal, by which ocean-going steamers approach the very doors of the city.

Within a radius of 50 miles of Manchester there are as many people as there are in the whole of Canada, and within a radius of 100 miles there is a population of some 20,000,000, about half the population of England and Wales.

With such a great consuming area in its immediate environs, the importance of the Manchester market to all producers of food stuffs is at once apparent. It is for this reason that it was included in our itinerary. The Smithfield Fruit and Vegetable Market covers six acres and is the largest of its kind in the United Kingdom. Other markets owned by the corporation cover 27 acres. There are also provided, adjoining the ship Canal, extensive lairages for cattle

and cold storage facilities for storing chilled and frozen meats.

We spent the morning in looking over the fruit, vegetable and produce market. The party was divided into groups with well informed guides, and was shown the peddler in the market and the methods of carrying on business. From here we proceeded to the tobacco factory of the Co-operative Wholesale Society, where every operation in the making of cigarettes, cigars, plug, twist or other forms of tobacco was shown to us in detail and before leaving we were presented with a substantial box of cigarettes and also one of cigars.

We next saw the buying room of the C.W.S., where samples of products were spread out for our inspection, also samples indicating the standards which they required for their purposes. We next proceeded to lunch in the Great Assembly Hall at the head office of the society, where we were addressed by two of the directors, Mr. Bradshaw and Councilor Sutton, who told us something of the history of the gigantic movement which has grown from a small organization of 48 affiliated societies, now one with over 1,200, and resources exceeding \$237,000,000.

(To Be Continued.)

Corn disappears when treated with Holloway's Corn Remover without leaving a scar.

913

Flares Below Pockets

Servicable, yet unmistakably chic. Style No. 913 employs one of the new, supple tweeds woven with metal threads. The vestee is of cotton faille crepe. The belt is made of course, Indian Fringe Willow silk in combination with harmonizing plain silk crepe, two surfaces of crepe satin, wool crepe and angora jersey are also adaptable. Pattern in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 20-inch contrasting and 3/4 yards of binding. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles will be of interest to every home dressmaker. Price of the book 10 cents the copy.

SUNDAY SCHOOL LESSON

JUNE 3

JESUS FACING BETRAYAL AND DEATH

Golden Text: "Not what I will, but what Thou wilt."—Mark 14:36. Lesson: Mark 14:1-42.

Devotional Reading: Psalm 22:1-5, 18, 19.

Explanations and Comments

The Announcement Of The Betrayal, verses 17-21. As Jesus and His twelve disciples were eating the paschal supper, Jesus suddenly said, "Verily I say unto you, One of you shall betray Me, even he that eateth with Me." With great amazement the disciples heard this startling prophecy. One of them, one of that little band whose lives had been so closely united with their Lord's, was to be guilty of so infamous a treachery!

"Is it I?" one by one they questioned. The form of the Greek implies a negative answer, as if each one said, "Surely it is not I!" Who hath saluted about the world of his own heart, sounded each creek, surveyed each shore, but that there still remains therein much terra incognita to himself? Thomas Fuller quaintly asks, "The mood of the disciples was that of self-satisfaction. They did not indignantly affirm the charge, nor passionately affirm their loyalty. Nor did they express of the horror of what he had not been born." The last sentence is a proverbial expression for the most terrible destiny, "forbidding the thought of any deliverance, however remote." Dante's estimate of the turpitude of Judas' crime— he places the betrayer in the lowest depths of the Inferno—is probably a true expression of the horror of his deed felt by the unsophisticated conscience that are the modern attempts to explain away his guilt." Wm. A. Grist.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomach conditions under which the worms subsist and drive them from the system, and at the same time, they are tonic in their effect upon the digestive organs, restoring them to healthful operation, ensuring immunity from further disorders from such a cause.

Canadian Exhibits Abroad

Will Place Canadian Exhibits Throughout the British Isles

Major J. G. Parmelee, assistant deputy minister of trade and commerce, is en route for England in connection with the installing of an extensive programme of exhibits throughout Great Britain with a view to further expanding the dominion's trade. The visit of Major Parmelee is a result of the enlargement of the exhibitions branch which has recently been taken over by the department of trade and commerce.

Among the large centres in which empire exhibitions will be held during the present summer are: Aberdeen, Birmingham, Belfast, Bradford, Bristol, Hull, Bolton, Leeds, Leicester, Manchester, Newcastle, Portsmouth and Plymouth.

Half Caine Is 75

Famous British Novelist Celebrates Birthday On Half Caine, novelist and dramatist, Greba Castle, Isle of Man, celebrated his 75th birthday recently. Knighted was conferred on Half Caine in recognition of his services as a writer of propaganda during the war.

It is understood that Sir Half Caine is now engaged in writing his own version of the life of Christ.

Surveying Air Mail Route

A survey will be made this year for a Canadian air mail route between Montreal and Winnipeg. This will consist of a series of detours, the best routes and locating landing fields. A recent announcement of four air mail contracts between points in Eastern Canada forecast more extensive operations along this line at an early date.

A Tire For Your Every Need

Firestone Dealers offer you a complete line of tires, each supreme in its class, headed by the famous Firestone Gum-Dipped Balloon. All are made by Firestone in the world's most economical tire plants—an assurance of the most for your money.

Firestone distributes tires only through regular service-giving dealers direct from Factory branches and authorized distributors—never through mail order houses or so-called special jobbers.

See the Firestone Dealer nearest you. He is prepared to serve you better and save you money, no matter what price tier you want to buy.

Wheat Pool Elevators At Vancouver

Over 600 men are now working on the new terminal elevator being erected by the Alberta Wheat Pool at Vancouver. This elevator will be completed by September 1st.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Benlat Bricketting Plant

Alterations are being made to the existing machinery at the Brickette plant at Benlat, Sask., and foundations are being built for additional machinery from England, of which, it is expected, there will be in the neighborhood of thirty carloads.

Cute in a Baby—Awful at Three—and it's Dangerous

by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce a crooked neck and it always interferes with digestion. Plugging the sleeve over the hand; attaching mittens, or putting on cardboard cuffs which prevent bending the arms at the elbow, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation and belchings. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain strength his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

AWARDS ARE MADE COVERING WAR LOSSES

Ottawa.—Canadians have been awarded \$6,289,389.34 as war reparations against Germany in a report by Commissioner James Friel, K.C.

The total amounts include \$4,246,865.75 assessed in favor of the claimants, and \$2,042,523.59 representing five per cent. interest on all awards calculated to March 10, 1928.

Claims dismissed by Commissioner Friel totalled 150 and involved \$31,556,846.03. Eighty-seven claims, totalling \$4,391,544.40 are dismissed in the report with the notation "no action, claims withdrawn, or not pressed, may be considered dead."

The records of the report states, cover loss of life and property on the British ocean liner Lusitania sunk by a German submarine off the coast of Ireland on May 7, 1915; on the Hesperian ship by enemy submarine September 4, 1915, and on other passenger and merchant vessels; merchandise lost on ships torpedoed; claims of fishermen and owners of fishing vessels sunk by submarines or raiders; claims for property destroyed in enemy territory; internment claims; claims of insurance companies for war losses; air raid claims; claims of ship owners and charterers; claims in respect to nurses and soldiers in hospital ships sunk; claims in respect of the Halifax explosion and other miscellaneous claims.

The awards of 1,613 claims dead with range all the way from \$30 to \$246,000. The largest amounts are awarded under the headings of steamship losses, which include \$226,316 awarded to the Canadian Pacific Line; \$346,000 to the Dominion Coal Company; \$300,000 to the Dominion Iron and Steel Company, and \$405,000 to the Nova Scotia Steel and Coal Company.

The T. Eaton Company, Limited, is awarded \$138,706.15 for merchandise lost on 19 vessels and goods seized at Antwerp. The total amount of this claim aggregated \$105,231.48.

Endorses Peace Treaty

Kellogg Plan Would Make Armies Useless Says Ramsay MacDonald

London.—When the great powers sign the treaty suggested by the proposals of the United States Secretary of State Frank B. Kellogg, the armies and navies of the world will shrivel up, Ramsay MacDonald, former Labour Premier, declared before the American Chamber of Commerce at a luncheon.

"Sign a multi-lateral pact outlawing war," said the leader of the opposition in the House, "and these false securities we have faintly trusted, these defensive armies which have never protected us, will disappear, because they are useless."

Mr. MacDonald described the Kellogg peace note as "this magnificent declaration of simple fact."

With one part only of the British reply Mr. MacDonald found fault—that regarding self-defence.

"When such a treaty is signed," he said, "self-defence becomes unnecessary and any aggressor immediately becomes an outlaw."

Shrine Destroyed By Fire
Regina.—Statuary constructed during the time of the French revolution was destroyed in a fire at the Sacred Heart shrine near Lebert, Sask., east of Regina. The shrine was levelled. Origin of the blaze has not been ascertained.

Many Dead In Mine Disaster
Mather, Pa.—The ill-fated Mather mine scene of a disastrous explosion, continues to give up its dead. The known death toll reached 82 and mine experts said that all other missing men numbering 115 would be added to the list of dead.

Memorial To General Booth
London.—The foundation stones of the Salvation Army training college, which is to cost \$1,425,000, have been laid. The building is being erected at Denmark Hill, in the Southeast of London, as a memorial to General William Booth.

W. N. U. 1735

Denies Dealing In Immigration Permits

Former Solicitor-General Declares Charge Is Wrong

Ottawa.—Hon. E. J. McMurray, former Solicitor-General, denied absolutely before the parliamentary immigration inquiry that he had dealt in immigration permits for \$100 apiece as charged by Alderman M. J. Coldwell, of Regina, before the immigration committee.

"I was astounded and stunned to read in the papers the statements of Mr. Coldwell," Mr. McMurray said. "I denied it and welcomed the opportunity of coming before the committee and clearing away the charge. I was glad to read the denial of the minister of immigration. What he said was true. I have had no dealings with Mr. Forke since he has been in office."

Mr. McMurray explained he had been elected in 1921 from North Winnipeg, which was half foreign born. Many of these people wished to bring relatives to Canada.

"I assisted them, but I never charged them a cent," he said. The numbers had become so great that later on he had charged them telephone costs and such things. Then he had turned them away.

The records of Mr. McMurray's law firm of 1922 showed that seven applicants had been handled by his firm. "in a strictly legal way."

The legal fees charged varied from \$15 to \$50. After his return to Winnipeg in 1926, four cases had been handled at fees of \$25 each.

Frown On Sunday Labor

Alberta Will Take Steps To Enforce Lord's Day Act

Edmonton.—Attorney-General Lynburn is instructing the Commissioner of Provincial Police to notify all police detachments in the province that it will be the policy of the department to secure a wider and better observance of the law in respect to Sunday work.

The local police will be expected to co-operate with the citizens in maintaining respect for the provisions of the Lord's Day Act.

Mr. Lynburn points out that under the extreme weather conditions that have prevailed at critical periods of the past two years, considerable leniency in regard to the Sunday law has been exercised, because a certain amount of Sunday work on farms was unavoidable.

He says that this is not, however, to be taken as establishing a precedent, and the law of the land still stands. An effort is now being made to appeal to the interest and good judgment of the general public in the direction of better observance of the day of rest.

Gives Life To Aid Science

Doctor Studying Source Of Jungle Fever Succumbs To Disease

New York.—An expedition into Africa in an attempt to discover the relation between South American and African yellow fever resulted in the death of Dr. Hyeyo Noguchi, of the Rockefeller Institute for Medical Research, the institute was advised.

Dr. Noguchi, discoverer of the source of South American yellow fever in 1916, died at Accra, West Africa. Recently he wrote to New York friends that he had been stricken with African yellow fever and had been in an African hospital from December 28, 1927, to January 9, this year.

He said his own was the first case of the disease to come under his observation and that from his bed he had directed the inoculation of a monkey with some of his own infected blood. The animal died 12 days later and additional experimentation, his letter said, disclosed the micro-organism responsible for the disease.

Japs Return Prisoners
Tokio.—Advices from Tainan, Shantung, say that after conference with the Nationalist authorities the Japanese agreed to return to the local Chinese police all prisoners and munition taken there in the recent trouble.

Sentenced For Mail Theft
Toronto.—Charles L. Pettit, local postman, was sentenced to four years penitentiary for the theft of letters from the mails.

CHIEF JUSTICE OF ONTARIO

Right Hon. Sir William Mulock, chief justice of Ontario, who was chairman at the Canada oratorical championship held in Toronto, May 18.

Says St. Lawrence Scheme Unnecessary

Report Given To Senate By Shipping Federation Officials

Ottawa.—"It is our firm conviction that the far as Canada is concerned the project is untimely and unnecessary," said A. L. W. MacCallum, manager of the Shipping Federation of Canada, to the Senate Committee on waterways with respect to the St. Lawrence project.

Mr. MacCallum assured the committee that the organization which he represented was concerned only with ocean shipping and that it was not wedded to any particular port or ports in Canada. It felt, however, that the immense expenditure on such a scheme as the St. Lawrence waterways could only be justified if it was proven that the benefits would be large.

The Federation had given special consideration to the matter and it has come to the conclusion that the expenditure at present was not warranted.

Buys Another Airplane

Baron Huenefeld Now Owns Sister Ship To The Bremen

Albany, N.Y.—Baron Gunther von Huenefeld, backer of the first successful westward flight across the North Atlantic, has purchased the Junker's plane Europa, sister ship of the Bremen, but what flight he plans in the new plane, are a matter of conjecture.

One report is that the German Baron, Captain Koehl, and Major Pizmaurice, would attempt a return flight to Europe, having the new plane shipped to New York from Germany. Baron von Huenefeld, however, denies that such are his plans.

He said it was possible that the plane would be shipped to Ireland, and that he and Koehl would fly it there to Germany, but that the plans were indefinite.

Cost of C.N. Equipment

Ottawa.—The Canadian National Railway purchased \$56,024,210 worth of equipment in Canada from 1923 to 1927, inclusive, it was stated in reply to a question in the House.

Scots From China

J. S. and Mrs. Calder are Scottish but their sons are Chinese if one is to derive nationality from place of birth. The passport problem was a puzzle but was solved in one way or another, for here they are "All aboard the C.P.S.S. Melita." J. E. Calder, senior, has resided in China for twenty-seven years and his sons spoke their native tongue before they learned English. They go to England to school.

Thornton Will Serve On League Committee

President Of C. N. Railways Has Accepted Appointment

Geneva.—Sir Henry Thornton, president of the Canadian National Railways, has accepted an invitation to serve as a member of the League of Nations Railway Committee.

Major-General Raymond D. Candolle, former manager of the Great Southern Railways of Buenos Ayres, also has accepted an invitation to serve.

Montreal.—Sir Henry W. Thornton, K.C.E., chairman and president of the Canadian National Railways has accepted an invitation to become a member of the railway sub-committee of the advisory and technical committee on communications and transport of the League of Nations, it was announced here.

The sanction of the Federal administration to the acceptance of the invitation was given to Sir Henry by the Prime Minister and by the Minister of Railways and Canals.

As Sir Henry may not be able to attend some of the meetings, permission has been given to P. A. Cleves, European traffic manager of the Canadian National Railways, located at London, to represent him when occasion requires.

May Not Be Nominated

Reported That Hoover's Chances For Republican Nomination Not So Good

Washington.—It is the well-founded fear in informed and influential Republican circles here that Herbert Hoover, prospective candidate for the Republican presidential nomination, cannot carry the country against Governor Alfred E. Smith of New York, whose nomination as democratic candidate seems assured, and this fear may eventually block Hoover's choice as party leader.

Hoover has identified himself with every policy of the Coolidge administration and is the popular Republican candidate. His nomination, however, is far from assured. The formal opposition to his candidacy within the party is fairly strong and well organized.

Coarse Grain Payment

Saskatchewan Coarse Grain Pool Making Second Interim Payment

Saskatoon, Sask.—A second interim payment amounting to \$730,381 is being mailed to members of the Saskatchewan Coarse Grain Pool. This represents a payment of 8 cents a bushel on all grades of oats except a few very low grades; and 10 cents a bushel on all grades of barley, flax and rye. This brings total payments to growers by the Coarse Grain Pool for the 1927 crop to the level of 53 cents a bushel for 2 c.w. oats, 75 cents for 3 c.w. barley; 1 n.w. flax, \$1.75 per bushel; and 2 c.w. rye, 95 cents per bushel basis Pool William.

Sir Arthur Currie III

Montreal.—General Sir Arthur Currie is confined to his home here recuperating from a slight illness. It is understood that Sir Arthur will visit Europe after McGill University closes for the summer holidays.

ROYAL SOCIETY HONORS THREE FELLOW MEMBERS

Winnipeg.—Distinguished scientists and scholars honored three fellow members of the Royal Society of Canada, in annual meeting here, when outstanding awards were conferred on Elias Carman, Canadian poet; Dr. A. P. Coleman, F.R.S., of the University of Toronto, scientist; and Dr. Thomas Chamaiss, of Quebec, historian.

To the distinguished Canadian poet was awarded the Lorne Pierce medal; Dr. Coleman was the recipient of the Flavelle medal, and Dr. Chamaiss received the Tyrell medal—the highest awards which science and literature can bestow in Canada.

The presentation of awards made by Professor A. H. Reginald Buller, F.R.S.C., of Winnipeg, president of the Society, featured the evening session held at the University of Manitoba.

Many papers on important scientific problems and addresses by outstanding historians were delivered before various sections of the society.

An interesting paper was presented by W. P. Thompson, of the University of Saskatchewan. He displayed slides showing the effects of "crossing" wheals of various strains; how the chromosome numbers of wheat could be calculated in second generation plants, and many important points in the practical breeding of grains.

Wheat, for example, he said, can be crossed with rye, provided wheat is the female parent, but not if it is the male.

A sum of \$35,000 has been placed at the disposal of the Royal Society as the nucleus of an endowment fund, by the Carnegie Corporation of New York. It was announced by Sir Robert Falconer, president of Toronto University.

The amount, he stated, will be retained exclusively for endowment purposes.

In reporting to the convention of the Society, Sir Robert said that the endowment committee had given consideration to the policy of raising a fund that would enable the society to be somewhat independent. The Dominion government, he said, so far had only given \$6,000.

Other assistance, however, was being sought.

Sixteen new fellows were declared elected to fill vacancies in the council. They are: Sir Robert L. Borden, W. H. Boyd, Ottawa; Robt. H. Clark, Prof. J. S. Delury, Prof. D. C. Harvey, of the University of Manitoba; L. L. Stines, Saskatoon; Geo. W. Scarth, Montreal; Stanley Smith, Albert Ferland, Rev. Father Hugolin, Oskar Klotz, B. R. MacKay, Right Rev. F. X. Ross, James Malcolm Swaine, W. Stewart Wallace and W. T. Waugh.

Alberta Forest Fires

Fire Raging On Both Sides Of The Athabasca River

Calgary.—Fire is raging on both sides of the Athabasca River where it joins the Slave River at Smith, division point of the Edmonton, Dunvegan and B.C. railway, a telegram informed the Calgary office of the Dominion Forestry Branch.

J. R. Hall, supervisor of the Lesser Slave National Forest, is in charge of fighting the fire. It is not in the National forest but in the near vicinity.

T. F. Biefgen, district supervisor of fire protection, said that the fire hazard in the whole Northern portion of the province was dangerously acute owing to last year's growth of rank grass and absence of rain to any extent so far this season. No damage has been reported.

"If present weather continued it will be very difficult to keep the fires under control," Mr. Biefgen said.

Honors Go To B.C.

Crescent Beach, B.C.—William Brankston, son of Mr. and Mrs. W. Brankston, of Atholano, a pupil of St. George's school, Crescent Beach, won a special prize awarded for geometrical drawing by the Royal Drawing Society of London. He took five honors and a pass for first place in the world, it is claimed, leading against 73,000 contestants.

CHAPTER XXIV.—Continued

With the letter in his hand Jack sat looking at his polluted house—the poor desolate, violated house, the emblem of his own life. He had built this house with his own hands, lovingly, taking pleasure in driving every nail and fitting every board. And now—and now—it had been with his life—he had lived it cleanly, decently.

Try as he would, Jack could not believe that Helmi had forgotten him. If the worst he feared was true, it was some racial fault in her—Helmi had not sinned as an individual. What did he know of her traditions? He felt he knew her but little, although she was his wife. Nothing could alter that—she was his wife.

A dog came whinpering to the door. As Jack opened it the sable colie, thin and miserable, morose neglected since old Sam had gone, looked timidly in at him. Jack recognized the animal—the crazy Englishman's dog. Mrs. McKinn had the Englishman had stayed at his house six weeks before. Here was the proof, and this explained the letters . . . "Arthur Warner" . . . Jack had never heard his name. He had seen him though, a strange, uncouth, unshaven fellow.

Restraining a first impulse to drive the dog away, Jack coaxed her to come in, in which she did, shivering. Her feet were sore, her nose hot. Jack went to the butcher shop and bought her some meat, which the hungry animal accepted gratefully. The dog was not to blame, whoever else might be.

The butcher told him about the dog. "The crazy Englishman had shot all his dogs but her. 'Cleo' is her name, and it seems he could not bring himself to shoot her. Old Sam looked after her until he got hurt and had to go to the hospital. Yes, sure, I'll give her bones. It's real good of you to be provident for her. The English-

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a
Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is the best medicine I have ever taken. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—MRS. MILTON MC-MILLAN, Vanessa, Ontario.

W. N. U. 1735

man wasn't any friend of yours either, was he?"

One resolve Jack arrived at—he must get out. He could not spend a night in his little broken house, every inch of which was so dear to him—the little house that had lost its soul. When Jack left it he did not think of locking the door, although there were things in it, the stove, chairs, table, beds, for which he had paid his hard-earned money. But it did not matter now. His little house, which he had built so eagerly, had been violated.

Jack sealed his letters and returned them to the Post Office, then hired a team at the livery stable and drove to Bannerman, where he would catch a train for Edmonton. On the way he met the time-keeper, who apparently did not want to speak, for although Jack drew up his horses the other went on. Recognizing Jack, he feared embarrassing questions in respect to the money which had been owing. The time-keeper had one rule if trouble seemed near make a wide detour and get around it. Something might happen before it again came near—someone might die—the world might come to an end—the coming of the war had made all things possible. So, instead of stopping when he saw Jack drawing up his horses, he hurried on.

Jack believed the time-keeper's reluctance to speak was because of what had happened, and his heart grew still heavier. A pale moon and starlight enabled the horses to follow the trail, leaving him free to pursue his own gloomy thoughts. He thought with a stab of memory, of the words he and Helmi said across the running water. The stream was silent now in its fetters of ice, and the marks of their feet in the soft, sandy bank had been obscured long ago. He wondered if Helmi had forgotten it—wondered, too, if he would ever be able to forget?

At the top of the hill, when the flickering lights of the little town came into view, Jack remembered Helmi's fears when they had come together. "It is not a friendly place," she had cried, "it will bring bad luck! See, the houses are like angry cats about to spring!" And he had laughed at her for her foolish fancy. He marvelled now at her premonition of evil! And, try as he might, he could not overcome his love for her. He wanted her, his high-tempored Finn girl, whose eyes were so tender. Helmi, with the lovely shining hair and the eager questioning mind. No! if he had lost Helmi he had lost everything. Life could not hurt him any more! If Helmi had deceived him he was proof against misfortune. He might as well go to the war, there was no reason for his staying behind, if Helmi were gone; and if he went he might meet Arthur Warner and pay off the score!

Having an hour to wait for the train, Jack wandered around the town. He did not wish to talk to anyone. The night was fine and clear, with Northern lights circling and folding in the sky with a crumpling sound like the rustle of silk. Pink and mauve, violet and amber, they advanced and retreated in endless manoeuvres, shooting, darting, rolling and unrolling, shimmering and dancing. He and Helmi had watched them with endless enjoyment from the north window of their own little house last year. A sudden impulse came to him to go and see the magistrate—he might know something. Anything would be better than this torturing uncertainty.

The magistrate was in and shook hands kindly—too kindly! Jack judged from his manner that he had some damaging evidence and that he was glad he had it.

"I came home today," Jack began at once, "expecting to find my wife, but they tell me she has gone to the city. I expected to be home a month earlier, but was delayed in the north. I can find no trace of her, nor any reason for her going. Do you know anything about her?"

"I did not know she had gone, until today," said the magistrate. "I had a letter from a friend of mine who saw her in the city."

Jack started eagerly. "Where in the city? I shall go there tonight."

The magistrate rubbed the bristles on his chin with a distinctly rolled forehead, then with one thumb he pressed back the cuticle on the other hand. He loved to do this. When he couldn't hurt anyone else he hurt himself. "I wouldn't try to find her, Mr. Doran, if I were you. She is

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, flexibility, freedom from rust, and many other good qualities, make it adaptable to a multitude of uses, a chief one being as a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package. 15W

In a place where you would not be pleased to find her."

"I don't care where she is—she is my wife, and I will never believe that she had done wrong unless she tells me so. I know her better than you do."

"I am sorry for you, Mr. Doran, and that is why I am so patient with you. This Milander girl has gone back to her old associates. The Chinese She is in one of the all-night eating-houses. I suppose you know what it means when a white girl goes into one of these places."

Jack sat staring at him. "Who was your friend who saw her there?"

"I would rather not tell—it is not necessary that I should—and he went in confidence. He knew I was interested. She evidently tried to get the quiet life here—these girls crave excitement. There was some talk about her and the Englishman who owns the bungalow at English River. He stayed with her for a week before he enlisted. That is common talk at the mines. Men who are going out to fight, you know, like to take their time."

He did not need to hurt his own thumb now—Jack Doran's face was enough. It had grown suddenly old and seamed and full of hatred. "His nostrils quivered like those of a race horse."

"He was about to go, but the magistrate waved him to a seat. "Mr. Doran, you were very indignant with me a year ago or a little less, when I dared to advise you. You were quite indignant, and of course I am ready to admit your feelings at that time were very creditable, very creditable—mistaken, but creditable. Since then you have had a bitter lesson, a very bitter lesson. I did not harbor any ill-will; on the contrary, I was very anxious to be your friend. I was your friend, even though you scouted my friendship." Col. Blackwood leaned over, and his voice fell. "A man in my position does not expect thanks; we do not get thanks, but that is quite all right. We do not respect thanks, but I hope you see that I was trying to befriend you."

(To Be Continued.)

Recipes For This Week

(By Betty Barclay)

TOASTED RAISIN SANDWICH
½ cup chopped American cheese.
½ cup nectar raisins.
6 drops tabasco sauce.

Pump raisins, drain and chop, using a coarse cutter. Blend raisins with cheese and spread on this buttered slices of bread. Put slices together as a sandwich and toast on both sides. Serve hot.

VANILLA JUNKET ICE CREAM

(Two Quarts)

1 quart milk.
½ pint cream.
1 cup sugar.
2 junket tablets.
1 tablespoon vanilla.
1 tablespoon cold water.

Mix milk and cream together, and warm to lukewarm—not hot, then add sugar and vanilla. Dissolve junket tablets in the cold water, add to the milk, stir well a moment, then pour immediately into the freezer can, and let stand in a warm room until firm—about 20 minutes. Place can in freezer, pack with ice and salt and freeze slowly to a thick mush, then flash freezing rapidly.

Crossword Puzzle For Blind

For the blind, a crossword puzzle has been produced in Braille. It consists of a piece of stiff cardboard made of many lines of individual squares, in which the blind can "peg" letters that make up words. Squares marked by cross lines take the part played by the solid black squares in ordinary crossword puzzles. Directions are given in Braille printing.

For Hay Fever—use Minard's.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

PRE-NATAL DIET

There is a phrase respecting Motherhood "for every child a tooth"—which is to say that during the period of formation of the little life certain changes take place in the mother's teeth causing them to decay and be more easily lost. And this is so. But why?

For the rearing of the little structure that is so quietly proceeding, the little bone-builders, in their construction of the bones and teeth, depend chiefly on the calcium salts. Should the mother's diet be deficient in these building stones, the little workmen are obliged to go to the only other available sources of supply, the bones and teeth, to meet their wants. Robbing Peter to pay Paul—if you will—yet the little structure must be reared at all costs. In a case the mother's teeth are so structurally weakened as to invite disease.

Not only to avert this disaster to herself, but keeping uppermost the welfare of the coming infant, and remembering that she must contribute generously towards the influence that will make for normally developed teeth in her offspring, the expectant mother should select her diet with the utmost care. Hence she should choose plenty of lime-containing foods—milk, eggs, cereals, the leafy-topped vegetables and fresh fruits.

Following birth also, the demand for calcium in the mother's diet is still high since, with the infant feeding naturally, as it should, the mother's milk requires large amounts of these salts. An inadequate diet on the mother's part certainly affects harmfully her own teeth as well as those developing in the nursing child.

Moreover, it should be stressed that if the teeth are to be of good quality the infant should at this time be naturally fed. The ravages of tooth decay have been found to be much greater among children who as infants had been artificially fed.

It is a matter of course that the mother should take at least a quart of milk a day in addition to her other food. This will ensure a proper start of the teeth in the jaws of the infant at birth and as well the proper bone development of the child generally.

Little Helps For This Week

"One that prayeth to God always,"—Acts x. 2.

Look up! look up! A Father's loving eye overlooketh all; Nay, more,—He all upholds, however small. Unknown to Him a sparrow cannot fall.

Look up! look up!

—Anna Maria Sargeant

Ah! never forget that. Heaven reaches down close—quite close—to earth, so that whoever raises his head in a right manner is sure to find himself in Heaven with our gracious God and all His holy angels, even though our blind eyes cannot perceive them. Looking up is our strength.

—William Ellery Channing.

A reliable antiseptic—Minard's.

Wonderful Paper Machine

A man of newspaper will be made every three minutes by the greatest paper-making machine in the world, now being made for the Great Lakes Paper Company, Ontario. This giant machine, weighing 2,000 tons, will produce paper 25 feet wide.

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every drugstore has it, but don't fail to ask the druggist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."

Aspirin is made from salicylic acid (found in willow bark). While it is well known that Aspirin means Bayer, many people do not know that the Bayer Cross is a trade mark.

British Columbia Poultry

Poultry and Egg Business Banks

High in the Province.

The poultry and egg industry ranks high in British Columbia and the total value of eggs and table birds commercially produced within the province in 1927 is estimated at \$6,200,000. In that year it is estimated there were 1,500,000 mature fowl on British Columbia poultry farms and, in addition, close to 2,000,000 young birds.

GIVE CONFIDENCE TO YOUNG MOTHERS

By Always Keeping Baby's Own Tablets In the House

A simple and safe remedy for the common ills of babyhood and childhood should be kept in every home where there is either a baby or a young child. Often it is necessary to take the little ones something to break up a cold, allay fever, correct sour stomach and banish the irritability that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the house as a safeguard against the troubles that seize their little one so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies.

Baby's Own Tablets are a mild but thorough laxative that act without gripping and they are absolutely guaranteed free from opiates or other harmful drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lost of people seem to think that the command "Thou shalt not kill" doesn't apply if the weapon is an automobile.

HERCULES

TRADE MARK
PERMANENT BUILDING PAPER

Beauty in a home may
be only skin deep.

A beautiful home is not always comfortable nor easily saleable.

Hercules does for a home what beauty cannot. Tested and proven wind proof and damp proof, Hercules makes a house warm and dry at all times—the home that buyers seek.

Hercules comes in three grades—x, xx, xxx—for various needs. How Hercules fulfills our claims is easily understood after an examination. May we send a few samples?

ROYAL HOTEL, Stony Plain

PHILIP MILLER, PROPRIETOR
TELEPHONE EIGHTEEN.

FIRST-CLASS ACCOMMODATION FOR TRAVEL
LERS. EUROPEAN PLAN.

RESTAURANT IN CONNECTION

Stony Plain and District.

Sunday next, June 3d, is the 63d anniversary of the birth of His Majesty King George V. The celebration takes place next day, which will be a bank holiday.

Mr Ferd. Horn has sold his butcher business to Mr Anton Bear of Edmonton. This gentleman is well known in the City as a first-class sausage-maker, and no doubt his reputation will bring him lots of patrons here.

M M Mecklenburg, the well-known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, June 1st. See him and see well.

Meredith Bros. are buying hogs and cattle at Carvel every week.

A New Elevator

Since last week's paper was printed, a change has been made in the plans for the local Gillespie elevator.

Mr John Gillespie, president of the company, paid the layout a visit the latter part of the week; on the conclusion of which it was decided to forego the original plans and erect an entire new structure.

The new elevator will have a 70-bu. capacity, and will sit farther back from the street line than the present one by some 20 ft.

The grain storehouse to the east will be left, but some 20 feet of this on its west end will be pulled down, to make room for the new position of the elevator proper.

All the latest appliances will be installed as the work progresses. The work of demolition of the old building commenced Monday.

Sporting Notes.

The ball game on Sunday afternoon between Stony Plain Senior and Muir Lake, team, on the latter's grounds, did not last long, rain stopping play in 2d inning. The game will be re-played afternoon of June 3d.

Baseball fans got their money's worth at the Holborn ball games on the holiday Spruce Grove beat Walther League; and the final, Stony v the Grove, was won handily by Bell's Pets.

Edmonton Beach Notes.

Edmonton Beach is putting on the swellest dance of the season Saturday night, June 2d, when Bob and his Troubadours from the City, six-piece orchestra, the best that money can secure, 2 saxophones, banjo, piano, violin, traps and drums. We ask your patronage this Saturday, especially as we have something in store for you. Let's go! THE BARRIES.

BIG DANCE!

Spruce Grove Pavilion.

Martin's Orchestra.

FRIDAY, JUNE FIRST.

Everybody Come!

Calendar.

June—
1—Mecklenburg at Stony.
1—Dance at Spruce Grove.
2—Dance at Edmonton Beach.
3—King's Birthday.
4—Bank holiday.
6—Wednesday's half holiday starts.

Max Says: 1

Wasn't Sunday the damp fine evening? Yuh!
A fellow sat me the odder day which barber was Ticklish.

Holborn's Successful Picnic.

"Bigger and better than ever," was the unanimous opinion of those who attended Holborn's picnic on Victoria Day. Every form of amusement for everyone had been provided, and the bigger-than-ever crowd enjoyed itself to the utmost.

The address on the aims and objects of the U. F. A., given by Hon R G Reid, was listened to attentively by all present.

At 9 p.m. the big dance hall was unable to accommodate all those who wished to trip the light fantastic.

Following are results of the various contests:

Boys under 8—A Nother 1, Gordon Larson 2
Girls under 8—R Carmichael 1, G Brummet 2
Boys under 12—H McDonald 1, P Smith
Girls under 12—J Everington 1, D Willie

Boys under 16—A Maclean 1, H Macdonald
Girls under 16—A Maclean 1, E Willie

Young Ladies—S MacKinlay
Young Men—L V Kimmery

Lady's needle race—S MacKinlay 1, Mrs D Sutherland

Teachers Protest

Several complaints having been received from teachers in the rural school districts regarding representations made by a book agent who has recently made a canvassing tour, an investigation of his operations has just been completed. It is alleged that the books he offered were sold at a much higher price than the value of these warranted; and his connection with the provincial Dept. of Education was purely imaginary.

Golden Spike News

At Golden Spike, Friday, May 25, to the wife of Mr Louie Giese, a daughter.

Mr Carl Schweitzer, Golden Spike, moved last week to his recent purchase, the Henning farm, a mile north of Old St Paul's church.

On Friday evening, May 25, Henry Schoepf, who lived with his parents at Golden Spike, mounted his pony and left for a trip to a neighbor. The pony returning about 10 p.m., riderless, a search was made for Henry. He was found, lying unconscious.

He was carried home, and everything done to restore him to restore consciousness. The efforts failed, and he passed away the following day.

Deceased was a son of Mr and Mrs Val Schoepf, and was in his 21st year. Funeral services were held Monday from Golden Spike Church. Rev P Hanneman conducted the service.

Spruce Grove News

The funeral took place on Sunday last of Mr Adam Goebel, who had died May 24th. Deceased was in his 17th year, and had passed away in an Edmonton hospital following a recent operation. Rev G Poetzsch, pastor of St. Matthew's Lutheran Church (Manitoba Synod) conducted the services.

A big dance is billed for the Grove tomorrow (Friday) night. Martins will provide the music, and the proceeds go the ball team.

The Construction Co. has increased its staff of carpenters, and work on the elevator is now progressing rapidly.

Bill Mazurek, of the C. N.R. staff, has purchased a Chevrolet sedan from the Stony Plain agents.
